The Friendly paper honeycomb

COMPANY

HISTORY **Ti-Vu Plast** is established in 1967 by **Mr. Danilo Vanzo** and manufactures paper honeycomb for hollow panels for pieces of furniture and interior doors.

1980 The honeycomb stringer (paper honeycomb glued with two paper covers) is created for the storage and transport of corrugated cardboard and boxes.

1991 After the great success of the paper honeycomb stringer, la **Ti-Vu Plast** moves to the new premises and starts to manufacture **NIDOPAN®** the cardboard panel with a honeycomb structure. Thanks to its lightness and recyclability, it has replaced many plastic materials used in the packaging industry.

2004 All **Ti-Vu Plast** departments obtain the UNI EN ISO 9001:2000 Quality Management System Certification, as a completion of the dedication and punctuality of all the company members and personnel who devoted themselves to this commitment sparing no efforts.

2009 **Ti-Vu Plast** receives ISO 9001-2008 certification with the new procedures.

Ti-Vu Plast currently extends over a total area of 25,000 sq. m. of which 6,000 sq. m. are covered. It manufactures paper honeycomb, stringers, **NIDOPAN®** and paper honeycomb pallets, that can be delivered to national and international customers by means of four trucks owned by the company.

OFFICES The Ti-Vu Plast premises with the offices and administration department.

WAREHOUSE A 2.000 sq. m. warehouse for storing raw materials.

LOGISTICS deliveries with motor vehicles owned by the company.

The Royal Air Force was among the first that exploited the strength of honeycomb in order to manufacture, during Second World War, the aluminum **honeycomb structures** necessary to build aircrafts. Nowadays, **honeycomb** is also manufactured in **Kevlar and carbon fiber**, also used in **Formula 1** and for **sailing boats**.
