

NIDOPAN®

NIDOPAN®

The **Friendly** paper honeycomb

NIDOPAN®

NIDOPAN®

In 1991 the **NIDOPAN®** panel was born in the sign of **green packaging**. **NIDOPAN®** is made up of a paper honeycomb core glued with two **recyclable** cardboard covers (Test-Liner or Kraft) featuring different grammages, ranging

from 180 up to 500 gr./sq. m. **NIDOPAN®** crushing strength ranges from 1.5 to 3.7 Kg./sq. cm., depending on the cell sizes and on the cover grammage, as confirmed by the tests carried out in external laboratories.

STRENGTH, LIGHTNESS AND RECYCLABILITY are the features that make **NIDOPAN®** a unique panel.

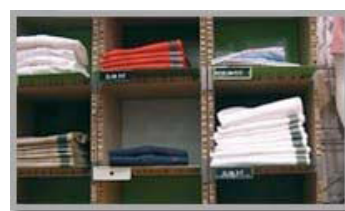

Its maximum size is 500 cm (length) X 120 cm (width) and it can be supplied with a thickness ranging from 10 to 120 mm.

Since it is **recyclable**, it can be re-used, together with cardboard boxes, just like any other paper packaging.

NIDOPAN® APPLICATIONS :

Due to its honeycomb structure which allows for shock absorption, **NIDOPAN® is used as...**
